The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).  Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).					
Status					
1) Responsive to communication(s) filed on 10 M	a <u>y 2004</u> .				
2a)⊠ This action is <b>FINAL</b> . 2b)☐ This	This action is <b>FINAL</b> . 2b) ☐ This action is non-final.				
3) ☐ Since this application is in condition for allowar	Since this application is in condition for allowance except for formal matters, prosecution as to the merits is

Art Unit: 2853

### **DETAILED ACTION**

# Claim Rejections - 35 USC § 102

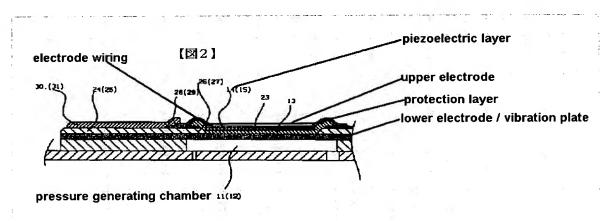

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

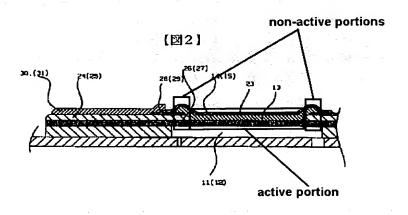

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 5-8, 10, 11, 15, 20, 21/(1, 5-8, 10, 11, 15, 20), 23, 24 are rejected under 35 U.S.C. 102(b) as being anticipated by Katakura (JP 11-70654).

Katakura discloses all features of the claimed invention as clearly illustrated below.

Art Unit: 2853

# Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

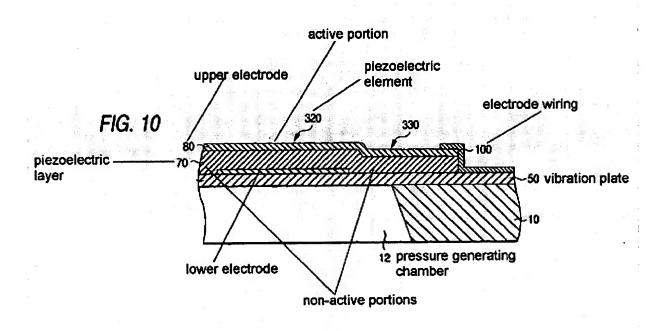

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 2-4, 9, 19, 21/(2-4, 9, 19), 22, and 25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shimada et al (EP 0 976 560 A2) in view of Katakura (JP 11-70654).

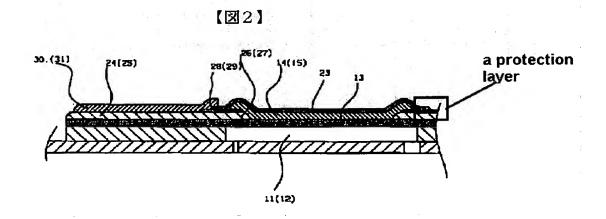

Shimada et al discloses all features of the claimed invention except for a protection layer being provided only on/in the other end portion, the protection layer possesses with higher rigidity than the lower electrode, and a tip portion of the protection layer

Art Unit: 2853

having a triangular shape. See particularly column 17, lines 11-15, column 18, paragraph [0147] and the illustration below for the major elements of the claimed invention.

However, Katakura discloses a protection layer only on/in one-end portion as clearly illustrated below. The protection layer illustrated below possesses higher rigidity than the lower electrode [13] because the protection layer is thicker than the lower electrode.

Art Unit: 2853

It would have been obvious to one having ordinary skill in the art at the time the invention was made to include the protection layer as taught by Katakura in the teaching of Shimada et al for the purpose of preventing crack on a piezoelectric element.

With respect to the tip portion of the protection layer having a particular shape, it has been held that changing the configuration of a claimed element is generally recognized as being within the level of ordinary skill in the art when absent of a persuasive evidence that the particular configuration of the claimed element was significant. In re Dailey, 357 F.2d 669, 149 USPQ 47 (CCPA 1966). Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to change the configuration of claimed element to have such portion in any shape including the one recited in the claim for the same purpose of preventing crack on a piezoelectric element.

### Response to Arguments

Applicant's arguments filed 05/10/2004 have been fully considered but they are not persuasive.

The applicants argued that the alleged electrode wiring of Katakura is not drawn out from the alleged upper electrode. The examiner does not agree. As shown in FIG. 2 above, it is clear that the electrode wiring is drawn from at one end of the upper electrode at which the piezoelectric is non-active. In addition, the applicants argued that the electrode wiring and the upper electrode are two separate elements. However, the claimed language of claim 1 does not define the separation of the electrode wiring and the upper electrode.

Art Unit: 2853

#### Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to LAM S NGUYEN whose telephone number is (571)272-2151. The examiner can normally be reached on 7:00AM - 3:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, STEPHEN D MEIER can be reached on (571)272-2149. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
